

JOB SYNC

THE SIMPLEST AND MOST USER-FRIENDLY MACHINE-TO-MACHINE SOLUTION ON THE MARKET

Utilizing the power of Slingshot, multiple users can now collaborate on a job simultaneously or days apart – a powerful tool that practically eliminates the potential for overlap or misapplication between multiple machines.

- ▶ Shared Coverage - multiple at once, or one at a time
- ▶ Fault Tolerant Data Channel Connection - if there is an interruption in network connectivity coverage is re-synced when connection is restored
- ▶ Machine-to-machine job status widget - know who else is currently in or has been in the job
- ▶ Live Web Viewer
- ▶ Joining a job is as easy as starting a regular job

Live Coverage Sharing

- ▶ Multiple machines at the same time
- ▶ Multiple machines over time
- ▶ Shared guidance lines
- ▶ Shared coverage – section control
- ▶ Identical machines not required

Everybody is on the Same Page

- ▶ Job lists are synchronized between displays
- ▶ Create jobs from Viper 4 or in Job Generator
- ▶ No operator learning curve – start jobs as normal
- ▶ See live progress of work from Slingshot Web

COMPATIBILITY

Use Job Sync on your Viper® 4 or Viper® 4+ field computer
